

# ***Trix DrawingCenter™ 5 Demo Quick Start***

## ***Installation***

The archive you received contains files: DCV5US.exe, TrixDrawingCenterManual.pdf and this QuickStart. Run DCV5US.exe to install your Trix DrawingCenter demo software.

**NOTE:** In demo mode the software runs fully for the first five of your own files that you open (plus the Examples provided with the demo). This limitation is removed on purchase of a full license.

## ***Opening files***

Use File – Open from within the application or double click on a file to open it in Trix DrawingCenter.

**Files on CD-ROMS:** Copy files from CD-ROMs before opening them. Trix DrawingCenter never changes the original file but it does store markup and scale information which must be written to a regular disk.

### ***Need help?***

Please call us on (978) 256-4445 or email [support@trixsystems.com](mailto:support@trixsystems.com).

TracTrix is a very powerfully and fully featured conversion, editing and markup tool. To achieve the best results we strongly recommend that you read the tutorial section of the full manual.

### ***To order:***

Visit our Web site at <http://www.trixsystems.com> and click on the Buy tab. Or call us on (978) 256-4445. In Europe call our offices in Sweden at +46 (31) 337 90 90.
